

## DNA Services and Prices

### Workshops (one to one)

Beginner's guide to DNA and genealogy	\$200
Develop a specific DNA testing plan	\$200
Interpret your DNA test results	\$200

### Talks and presentations for groups (approx 1 hr)

Introduction to DNA and Genealogy	\$250
DNA testing - which one is best for you?	\$250
Hidden Secrets - a DNA mystery story	\$250

### Extended lectures and courses

DNA, genealogy and tests (2 hours)	\$500
Tools for interpreting DNA results (2 hours)	\$500
DNA, genealogy, tests and tools (3 hours)	\$750
Brick Wall Busting – combining genealogy with DNA to trace your past (6 hours across 3 sessions)	\$1500

### DNA Consulting

Our fees are **\$100 per hour** (minimum of 5 hours) plus out-of-pocket expenses at cost

#### Services offered:

- download raw data (from Ancestry and others)
- upload to other sites (My Heritage, FamilyTree DNA, Gedmatch and others)
- manage your test kit
- interpret results
- analyse matches
- manage contacts
- conduct DNA-linked genealogical research

## About TimeTrackers

**TimeTrackers** exists to help people like you trace your family history and tell your story.

We're a family business based near Fremantle and we've helped thousands of people throughout Western Australia. We also help clients from all over Australia, the UK, USA and Canada.

Because DNA testing has now become a mainstream tool to help family history research, we also offer **DNA advice and consulting**. Give us a call or check our web-site if you'd like more information.

### How to contact us

Contact Lesley or Mike at **TimeTrackers** in Palmyra to arrange an obligation-free discussion about your needs.

Phone	(08) 9339 8078
Mobile	0407 669 376

# Starting your DNA journey?

These two-hour Workshops might help you:

## Beginners guide to DNA and genealogy (\$200)

- Genealogy basics, DNA basics, inheritance, DNA tests: who to test, which tests to use, costs, what the tests reveal. (Note: this is a generic education session.)

## Develop a specific DNA testing plan (\$200)

- Your goals and objectives, your family tree, your budget, suitable tests and costs, who to test, action planning.

## Interpret your DNA test results (\$200)

- Review your results, including matches, closeness of relationships, check against your family tree, recommend next steps. (Note: we will require access to your testing company results for this session.)

Workshops are normally held at our home in Palmyra, timed to suit you, and are usually one-to-one tuition. We can also visit your home to run a workshop, for an additional fee. Please call Mike for details.

## Talks and courses

- We also give general talks and presentations on a variety of family history subjects, as well as DNA basics and DNA testing, at FHWA, libraries and other venues, including outside the Metropolitan area.
- We run courses and workshops for both beginners and more experienced practitioners through UWA, local councils and other venues. Check with us to see what's coming up, or if you'd like an organisation to book us.

# DNA Consulting...what can TimeTrackers offer for \$100 an hour?

## We can guide you through the early confusion

DNA test results can be confusing, with different tests being offered by the major testing companies. A number of helpful sites have sprung up, such as Gedmatch, DNA Painter and others. The specific language of the DNA world can overwhelm with terms such as centiMorgans, 'snips' (SNPs), haplogroups, autosomal, etc.

We can be your guide through the initial learning phase, or we can take over the burden for you, with services ranging from basic advice through to totally managing your test regime.

## We offer these specific services:

### Specific in-depth education using your results

While we offer a standard one-off workshop to interpret client test results, you may want more in-depth professional advice about the results, whether they support a hypothesis or not. And often there is much more that can be learned over time by looking closely at shared matches, chromosome browsers, one-to-one matches, gedcom trees and the various tools available on each site.

### Download your raw data

This task, although quite simple, can confuse novices and take longer than expected. We have accounts (and experience) with the major testing companies and understand their vagaries. And we can upload your data to other testing companies to broaden your exposure to other groups of matches (not to ancestry.com at this stage)

Below: Gene map Chromosome 2

## Select appropriate sites and upload your data

Sites such as Gedmatch, DNA Painter and others have very specific requirements for uploading data from the various testing companies. Because we use all the major sites we can open accounts for you and manage this issue.

## Select analytical tools and run reports

More and more people are sharing their results in these sites, and a growing number of tools and reports have become available for analysing your data. This increases the chance of getting good matches and also extends the possibility of working out just where your ancestral DNA came from.

## Interpret results of analytical reports

The various reports and graphical outputs available from sites such as Gedmatch are extremely helpful, but require some learning to get the most from them.

## Advise on who to contact and what to say

With potentially thousands of 'matches' the work begins – who is worth contacting and why? We can analyse your matches and help you decide.

## Manage your kit

You might decide that you can't be bothered responding to contacts, checking new matches, etc. We can act as managers of your account with the testing company or with the other analytical sites, and contact you when something of interest turns up.

## Research to extend your tree

Based on the information you get from your DNA results, we can carry out conventional genealogical research to extend your tree, guided by the results of your tests.

Who knows what brick walls will tumble?
